*McGan Business Solutions Can Help Your Company Be More Competitive*

Competition has never been more intense than in today's market. No matter what your product or service, it seems that someone else is willing to provide it for a lower price., or at higher Quality.

Old Profit Model  
 $Cost + Profit = Selling Price$

The old way of making a profit no longer works in today's market.

Today, the Marketplace determines what consumers are willing to pay for a product or service.

Today's Profit Model  
 $Selling Price - Cost = Profit$

Since the Marketplace sets the Selling Price, the only way you can maintain or improve your profit is to reduce Cost.

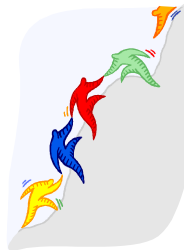

That's where McGan Business Solutions can help.

**Cost Reduction Through Efficiency Improvements**

The success of Toyota over the years has resulted in much attention on their methods, which are commonly known collectively as the "Toyota Production System." These methods have more recently been more widely discussed as "Lean Manufacturing."

Lean Management methodology is commonly used in a manufacturing environment, but can be just as effective in non-manufacturing applications, such as offices and service industries.

McGan Business Solutions brings years of lean management implementation knowledge and experience to your company. We work with your team, providing hands-on training to help them learn how to effectively apply the appropriate lean tools. Our goal is to teach you the tools, so that you can effectively use the tools after we leave. We "teach you to fish."

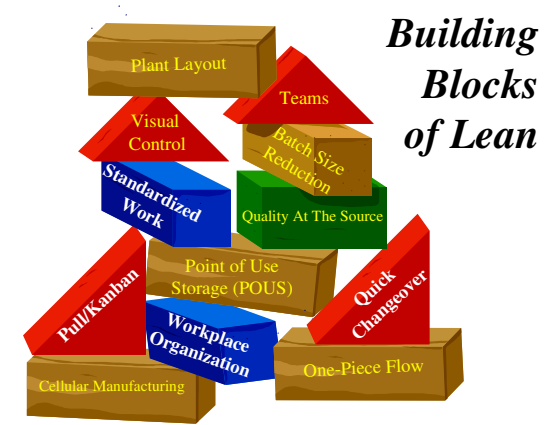

One of the most important tools is to identify and eliminate the various forms of Waste in your operation. And when Waste is eliminated, Cost is reduced, and Efficiency is improved, which leads to an improved profit picture for your company.

**MBS Areas of Expertise**
