Cost Savings Through Contracted Supplier Management

Let MBS Be Your Supplier Management Department

Does your company maintain a full-time, staffed Supplier Management Department, or a Supplier Quality Engineer who interfaces with your Supplier community?

If so, MBS can be a cost-effective alternative for this necessary activity. We can handle those necessary Supplier Management activities on an as-needed basis - reducing your labor costs and freeing your in-house team to focus on other key activities.

Supplier Management Activities

- √ **Potential Supplier Investigation / Assessment** - our team will assess potential suppliers' capabilities to meet your requirements. Let us do the leg work for your team.
- √ **On-going Supplier Assessment** - where your Quality System includes on-going Supplier Assessment, MBS can perform Quality System assessments at your Supplier location(s) as required.
- √ **Production Approval Process (PPAP) Management** - we will communicate supplier approval requirements to your suppliers and handle all required approval activities.
- √ **Supplier Training to Improve Quality** - MBS will provide targeted, specialized training, as necessary, to help your suppliers improve their Quality performance.
- √ **Problem Resolution Activities** - should a quality issue arise with the supplier, we will work with the supplier as necessary to develop an effective problem resolution, using your Quality system's approved method.
- √ **Source Inspection Activities** - MBS will perform special or on-going source inspection activities where those activities are part of your Quality Plan.

We would be happy to discuss other Quality-related services that your company might require.
